

Two Bear Farm

2015 Plant CSA

You asked for it, so here it is! New in 2015, we will be offering vegetable plants for sale via a Plant CSA. There are 4 pre-packaged options to help you with decision making, or, for the more adventurous, a pick-your-own option (\$50 minimum). We are only offering plant starts for those crops that do best when transplanted in our area. For crops such as carrots, beets, and spinach, which are direct seeded, we will have seed packets on hand that you can purchase at the time you pick up your share.

How does this work?

Pick one of the 4 packages on this page, or select your own plants on page two. Send in your form with payment to 1978 KM Ranch Rd, Whitefish, MT. We will purchase seed, and start your plants alongside our farm production. Plants will be available for pickup on May 23rd, 2015 (time will be determined later) to coincide with the planting season. We will provide planting advice and a Q&A session during the pickup to answer any questions you might have. All seeds, potting soil, and amendments will be Certified Organic. We can also make special arrangements if you need your plants earlier or later than May 23rd.
